

SEMASC Erasmus + Sport project – External evaluator recruitment

Presentation of the SEMASC Project:

Amateur sports clubs (ASCs) form the basis of mass sports participation in many European countries.

At the same time, ASCs are increasingly confronted with the economic effects of financial and health crises. These multiple tensions that ASCs have to face result in a transformation of their economic model, which can lead to a shift in the organisation's objectives and to dysfunctions. The Socio Economic Models of Amateur Sport Clubs (SEMASC) project is a cooperation partnership between 5 European countries in close relation with one non-European partner bringing together multiple stakeholders from the non-profit sport sector (Olympic Committee, National Sports Agencies, Federations, National Institute of non-profit organisations) and researchers.

The main objective of the SEMASC project is to create training materials to assist amateur sports clubs through parameters and indicators to assess and improve their socioeconomic model. It will give federations and Olympic committees the opportunity to enable the transformation and organizational change leading to improvements and new approaches to socioeconomic model of amateur sports clubs.

The second objective is to allow Olympic committees and federations to increase the resilience of ASCs. The resilience of the ASCs is becoming recently one of the most common challenges for sport organisations mainly due to the Covid-19 crisis.

Role and responsibility of the external evaluator:

Experts evaluate project proposals against the requirements of the call, assessing the quality, relevance, and potential impact. They provide feedback throughout the project's lifecycle, assess outcomes, and provide recommendations for improvement. An external evaluator produces final reports that detail their findings, including strengths, weaknesses, and suggestions for future actions.

Key skills and experience:

- Professional experience:

A minimum of 3 years of professional experience in a relevant sector is often required.

- EU project experience:

Experience in the management, implementation, or evaluation of projects funded by the EU is highly valued.

- Language skills:

Excellent English language skills are mandatory.

- Analytical skills:

The ability to analyze and evaluate project data, including feedback from questionnaires and interviews.

Application deadline: November 25th, 2025

Required document: CV

Applications have to be sent by email to: project-semasc@univ-lille.fr
